Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

REQUEST FOR CONTINUED EXAMINATION

The request filed on September 22, 2003 for a Request for Continued Examination (RCE) under 37 CFR 1.114 based on parent Application No. 09/620,227 is acceptable and a RCE has been established. An action on the RCE follows.

Response to Arguments

Applicant's arguments filed September 22, 2003 have been fully considered but they are not persuasive.

Regarding the argument towards claims 1-10, 12, and 52-55 that are rejected under 35 U.S.C. 102(b), as noted in the prior office action, the phrase "endothelial cells that have been genetically altered to express or over express..." is being treated as similar to a "product-by-process" type claim. Because the cells already naturally express **at least one** cellular adherence factor it is the same as the endothelial cells **claimed**.

In response to applicant's argument regarding claims 11, 19-25 and 51 that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, as noted in the prior office action, one of the references,

Art Unit: 3738

Nakamura provides the motivation "promotes the adhesion of endothelial cells"

(Abstract).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10, 12, and 52-55 remain rejected under 35 U.S.C. 102(b) as being anticipated by Pratt et al. Pratt et al. discloses a prosthetic vascular ePTFE graft seeded with genetically transformed endothelial cells from a vein of the host or other sources (col. 3, lines 29-36).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 19-25 and 51 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Pratt et al. in view of Nakamura et al. Pratt et al. discloses a prosthetic vascular ePTFE graft seeded with genetically transformed endothelial cells however fails to disclose a method of genetically transforming the endothelial cells to

Art Unit: 3738

express DANCE. Nakamura et al. teaches genetically transforming the endothelial cells to express DANCE (p 7, pp 3), which promotes the adhesion of endothelial cells (Abstract). It would have been obvious to one of ordinary skill in the art to combine the teaching of genetically transforming the endothelial cells to express DANCE, as taught by Nakamura et al., to a prosthetic vascular ePTFE graft seeded with genetically transformed endothelial cells as per Pratt et al., in order to promote the adhesion of endothelial cells.

Conclusion

This is a continuation of applicant's earlier Application No. 09/620,227. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3738

the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
